Hybrid ONE satellite Prediluted

Highly flexible, quick and safe, enabling three cleaning functions with just one outlet

Nilfisk FOOD Hybrid ONE Pre-diluted satellite has only one outlet for rinsing, foaming and disinfection making the cleaning process faster and safer for the end user.

PD satellite is to be used together with the Mix Stations and is highly recommended for the Food & Beverage production plants with high safety standards, which does not allow concentrated chemicals inside the food processing areas.

It is a highly flexible station allowing usage of various Nilfisk FOOD accessory kits.

- Pre-diluted detergents are pumped from a central location to the unit. Ensuring no concentrated products in the production area and ensuring a uniform concentration all over.
- The CoronaTechnology air system patent pending – is a completely new construction that sets standards within the cleaning industry. Thanks to this system the air is injected into the water stream over a larger surface and at a higher speed. The result is a better mix of air, detergent and water that generates approx. 20% more foam.

Benefits

- Local product handling
- Direct product injection
- Optional product dosing (fixed, adjustable)

HYBRID ONE Satellite

Highly flexible, quick and safe, enabling three cleaning functions with just one outlet

Technical specifications	
Water	
Pipe dimension inlet Ø	1/2"
Pipe dimension outlet Ø	1/2"
Max. operational pressure	12-40 bar
Water flow	8-30 l/min
Min. pressure of water supply	12 bar
Max. pressure of water supply	40 bar
Max. temperature of water supply	70°C
Compressed air	
Min. pressure of air supply	6 bar - 200 NI/min
Max. pressure of air supply	10 bar - 200NI/min
Number of products	2
Weight	10 kg
Dimensions in mm	530x400x140

Standard models	
Model	Article no.
SUONEPD2	119000408
