

# HYBRID 7 NAVIGATOR

## Lets Keep An Eye On Things For You!

### What is Navigator?

Navigator is a web-based support program that provides technicians full remote access to your Hybrid 7 Single Boosters and Mainstations.

Whether on-site or remote, technicians can diagnose issues, adjust configurations and fine tune all machine settings remotely and effortlessly.

Enhance your HYBRID 7 Equipment with NAVIGATOR!

### Key Features:

#### User-Friendly Interface

Similar to TeamViewer, Navigator is intuitive and easy set up for seamless remote support.

#### Remote Access & Real-Time Monitoring

Access key parameters like water temperature, inlet pressure, and outlet pressure remote from any computer Anytime, Anywhere!

#### Instant Error Detection

Receive real-time alerts and diagnostics to minimize downtime and maximize efficiency.

#### No On-Site Visits Required

Simply grant access to the technician who can adjust settings, troubleshoot, and ensure smooth operation without requiring an on-site visit.
