

## Service Information no. 181

### Production stop - Chameleon Automatic Satellites

---

This Service information covers the following equipment, within the Chameleon product range: **Chameleon Advanced Satellite with automatic change-over Rinse to Foam (SA21, SA22, SA32, SA33)**

Having experienced more examples of an unstable automatic change over function in the Chameleon automatic satellites, Nilfisk-ALTO Food Division has taken the consequence and decided to stop the production of these satellites until we have discovered and solved the exact reason for the instability.

We are presently testing a new type of print, which seems be able to adjust the flow sensor signal and thereby solve the problem.

It is our hope, that the problem will be solved a.s.a.p. and we will of course inform you as soon as the satellites are ready for sale again.

The production of the Advanced automatic Main Station has not been stopped, as we are able to adjust the change over signal and as we have not experienced any problems with this Main Station.

Should you need any further information do not hesitate to contact Nilfisk-ALTO Food Division sales department, direct tel. No.: +45 7218 2000.

Best regards

**5th November 2008**

**Nilfisk-ALTO Food Division**
