

## Service Information No 186

### Reinforced adaptor for prof. block axle MM3xx and SMxx

The adaptor between the axle and the handle to switch from rinse to foam position, on the professional block, has now been reinforced. This to ensure that the adaptor does not break when you want to remove the handle from the front panel of the professional Chameleon Satellite and Main Station for dismounting.

The new adaptor has been introduced in the production 15-04-2009 from serial No. 46249.

You can order adaptor and steel pin at an extraordinary low price € 1,- until 1<sup>st</sup> July 2009, using NA-item No: 110000332. Returned broken adaptors will be credited € 1,-.

To change the adaptor, please follow the instructions below:

Should you need any further information do not hesitate to contact the sales department or the undersigned.
