

Service Information no. 201

Old S510

Not available anymore

Please order MSM-Foamguard Airomatic

As already announced in Service Information 198, from 29th April 2010, the new cross divisional "MSM Foamguard Airomatic" foam unit replaces the old "S510". Old stock is gone, so we can't deliver the S510 anymore. Of course spare parts will be available for the next couple of years.

The MSM-Foamguard Airomatic is delivered, with all accessories and ready for shipment in a plywood box. The launch kit is available at the divisional marketing departments of Ecolab and on the intranet site of Ecolab F&B Engineering. Please note that required water supply is 20 L/Min. and not 50 L/Min. as mentioned in earlier documentation.

Compared to the "S510" accessories, we have improved the MSM accessories to more industrial accessories, which are:

- **15M Topflex hose with SS couplings**
- **Professional low pressure handle/valve SS with protection and vulcanization**
- **SS hose holder**
- **SS can holder for both 5 and 10L Ecolab cans,**
(in case of 25 Litre can, please order special can holder additional, if needed.)

The MSM is also equipped with the BA-valve which fulfills the EN1717 :

"Protection against pollution of portable water in water installations and general requirements of devices to prevent pollution by backflow".

New MSM Foamguard Airomatic
