

Service Information no. 216

Changes at Foamatic – NEW Corona Technology!

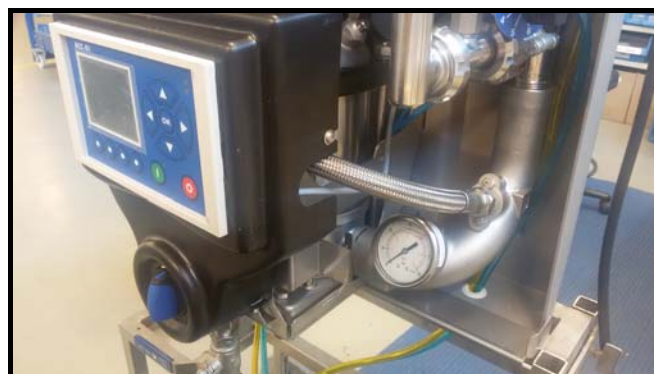

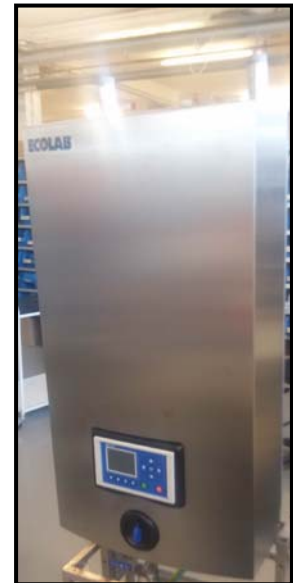

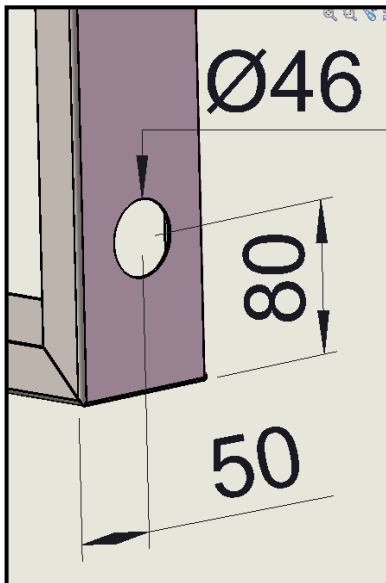

The manual outlet has been changed at the Foamatic Satellite and Foamatic Main-station, due to new hygienic weldings and new technology.

Furthermore, there have been some changes in hoses and flow-switch.

In the Main-station and Satellite the block has changed into the NEW Hybrid block – this means a new technology with one outlet instead of two - plus Corona foam.

In the Satellite the hoses for suction have been changed into 9/6 mm type – both for manual and automatic part. Changes are compatible with the older version – need to add an Ø46 hole to the cabinet. Complete number for NEW manual block for Foamatic Satellite in Hybrid version is - 110003908.

The Main-station has been turned into a Hybrid design with new cover and block. -So different design – same improved functionality. The flow-switch has been changed to a ¼" threaded model. Older version of Foamatic Mainstation can be rebuilt into Hybrid / Dou block – cover parts have to be changed. The new Foamatic Main-station has new item numbers please see next page.

October 2014

Foamatic Mainstations with controller

Model	Description	Article no.
