

## Hybrid Typhoon 40 - New pump

This is to inform you that the standard 40 bar pump for Typhoon Dual/Hybrid Typhoon 40 (CRNE 1-23 w/Grundfos frequency converter) is no longer available from Grundfos.

The alternative pump for Hybrid Typhoon 40 is a new CRNE 1-23 with permanent-magnet motor. There will be no difference as to the pump performance.

This means that in the future, spare pumps for Hybrid Typhoon 40 and Typhoon Dual (old version 40 bar) will be available as follows:

### **For Typhoon Dual ('old' Typhoon 40):**

**Pump stack** CRNE 1-23 (old type) – item No. 110005540

(please note this is only the pump stack/impellers and not the complete column)

**Motor** for CRNE 1-23 **incl. frequency converter** – item No. 110001730

(NB: only for Typhoon Dual)

**Frequency converter** for CRNE 1-23 – item No. 110001902

### **For Hybrid Typhoon 40:**

**Pump complete** new CRNE 1-23 with permanent-magnet motor **incl. frequency converter** – item No. 110005566

Best regards
