

New and Updated Hybrid ECO Satellite with Corona technology

We are pleased to introduce to you the last and latest updated satellite from our satellite range

The Hybrid ECO satellite.

Introducing an entirely new and updated look - the one injector unit - for foam detergent or spray sanitation and rinse - is still very easy and simple to mount and service.

However, the satellite now also features our **patented Corona Technology** air system.

The Corona technology injects air into the water stream over a bigger surface and at a higher speed.

End-result is a better mix of air, compound and water generating approx. 20% more foam.

Less detergent. More foam. Longer cling time.

The Hybrid ECO satellite is especially suitable for applications like Food & Beverage, Meat, Brewery and Dairy. It will be available from 1st June 2021 and the previous ECO satellite will be discontinued as from 1st July 2021 (it will be available as long as it is in stock).

When ordering the new and updated Hybrid Eco please use this item no/ EBS no: 110007117/10056233.

We look forward to hearing from you!

Should you need any further information do not hesitate to contact our sales department on tel: +45 2969 5100 or info@nilfiskfood.com.

Best regards
