

New standard tank controller board in Hybrid mainstation/Booster single pump/Booster multi pump units

This is to inform you that Nilfisk FOOD has changed the standard controller board for:

Hybrid Compact Main station (MD421/MD422)

Hybrid Main Station (MU421/MU422)

Hybrid Booster Compact (BW4P)

Hybrid Booster (BW4H/BWH7)

Booster Single pump (BF4+/BF8+)

Booster Multi pump (BF16-2+/BF24-3+/BF32-4+/BF40-5+/BF48-6+)

There is no longer a specific item number for a multi pump boosters with tank control, as it is now possible to connect level sensors and a water valve, for filling the tank, to a standard controller board. There is now only one variant of our multi pump boosters unit as all "-T" models are obsolete. This change will have no price consequences to the applied units.

[For further information see inlet XJ13, 14, 15 and 16 and outlet XJ1 on enclosed pdf drawing.](#)

Best regards

Nilfisk FOOD
